iConverter™ Wall-Mounting Kit

User Instructions

Description and Inventory

The 8249-0 *iConverter* Wall-Mounting kit was designed to attach one *iConverter* 1-Module or 2-Module chassis to a wall, backboard or other flat surface. The 8249-0 kit should include the following hardware:

(4)	"L" shaped brackets
(4)	Flat head screws, 4-40, 1/4 inch
(4)	Wall mounting screws

Warning:

Before installing an *iConverter* chassis, make sure to remove it from its power adapter. Make sure to disconnect the power adapter from the AC line power.

Mounting:

1. Align the screw threads of the *iConverter* chassis with the holes in the bracket.
2. Attach one "L" bracket on each corner of the unit using the 4-40 flat head screws enclosed with the kit.
3. The *iConverter* with the tab brackets should like like the picture below.
4. Attach unit to the desired surface using the appropriate screws (not provided).
5. Follow any installation instructions in the *iConverter* User Installation Guide.
